Community

Quantum Logics Community is a global community of developers, innovators, and technology enthusiasts dedicated to learning, collaboration, and innovation. We provide opportunities to work on real-world projects, contribute to open-source initiatives, explore emerging technologies such as Artificial Intelligence and Compiler Construction, and grow through mentorship and teamwork. Our mission is to empower individuals with practical experience, technical knowledge, and leadership skills while fostering a culture of creativity, continuous learning, and technological excellence. Build. Learn. Innovate. Together.

Experience

Project Captain

Jul 2026 – Aug 2026

- Led **2–4 teams** by conducting regular project streams to review progress, assign objectives, and ensure every team remained aligned throughout the development process.
- Collaborated closely with the **Commander** to coordinate project execution, monitor milestones, and deliver the complete project before the assigned deadline.
- Reviewed reports submitted by **Team Captains**, enforced community policies, and took appropriate administrative actions, including banning users for serious policy violations.

Team Captain

Jul 2026 – Jul 2026

- Led the team by conducting **3 weekly meetings** to discuss project progress, objectives, upcoming tasks, and ensure effective collaboration with the **Project Captain**.
- Recorded and published meeting sessions on the **QuantumLogics YouTube Channel** to keep all team members aligned, including those unable to attend live.
- Monitored team performance, resolved communication issues, and reported serious misconduct or repeated non-cooperation to the **Project Captain** and **Software Engineers** when necessary.

Projects

QUANTUMCHAT

QuantumChat is a secure real-time messaging platform available on web and mobile, featuring an integrated AI assistant for intelligent conversations, document analysis, and productivity. It uses a multi-layer encryption architecture with five private keys to provide enhanced end-to-end security, ensuring that messages remain accessible only to authorized participants. Designed with privacy, performance, and modern communication in mind, QuantumChat combines secure messaging, AI-powered assistance, and advanced encryption into a single platform.

QuantumChat-API ([Website](#)) ([Github](#))

Quantum Chat is a secure, real-time messaging platform built for seamless communication across multiple company websites through a centralized and scalable architecture.

QuantumChat Web ([Website](#)) ([Github](#))

Quantum Chat is a secure, real-time messaging platform built for seamless communication across multiple company websites through a centralized and scalable architecture.

QuantumChat AI ([Github](#))

Meet your Quantum Chat AI Assistant—always ready to help, answer questions, and make your conversations easier.

CALCULUSRUNTIME

Calculus Runtime is an advanced educational and computational platform designed to simplify calculus learning and problem-solving. It provides powerful tools for solving mathematical problems, visualizing concepts, and enhancing understanding through interactive learning experiences, making calculus more accessible to students, educators, and researchers.

Calculus-AI-Chatbot ([Website](#)) ([Github](#))

An AI-powered calculus learning platform featuring an intelligent chatbot, math formula rendering, study guides, and interactive quizzes. Built with React frontend, FastAPI backend, and Claude/OpenAI integration.

Certificates

Internship Completion Certificate (QuantumLogics)

9 Aug 2026
